

## High Point Neighborhood Center Green Team

A diverse group of volunteers interested in sustainable living and building has formed under the banner of the Neighborhood House Green Team. Its role is to help identify practical innovations that connect green elements and LEED<sup>™</sup> design features of the new High Point Neighborhood Center with interactive displays to educate a diverse multi-age, multi-cultural audience about living green. Our vision is to build a technologically advanced Neighborhood Center that combines services and environmental learning opportunities in an urban setting comprised of residents from all socio-economic and cultural backgrounds.
